Experiment -4

Library Book Reservation System for SIMATS Library Using Zoho One (SaaS)

Aim

To create a Library Book Reservation System for SIMATS Library using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the Zoho One cloud platform using your credentials.

2. Open Zoho Creator from the list of applications.

3. Create a new application named SIMATS Library Book Reservation System using a pre-designed template.

4. Select an appropriate template and customize it according to the requirements of the SIMATS library.

5. Open the existing form and add or modify fields to include the following library details:

- Book ID
- Title of the Book
- Author
- Publication / Publisher
- Year of Publication
- Edition
- Number of Copies
- Rack Number
- Book Status (Available / Taken / Returned)
- Student Name
- Student ID
- Reservation Date
- Return Date

6. Configure the field types appropriately by using text fields for the book title, author, publisher, and rack number; number fields for the publication year, edition, and number of copies; dropdowns for book status; and date fields for reservation and return dates. Use suitable text fields for student details.

7. Customize the form layout by arranging the fields properly and making essential fields mandatory.

8. Save the changes and publish the customized application.

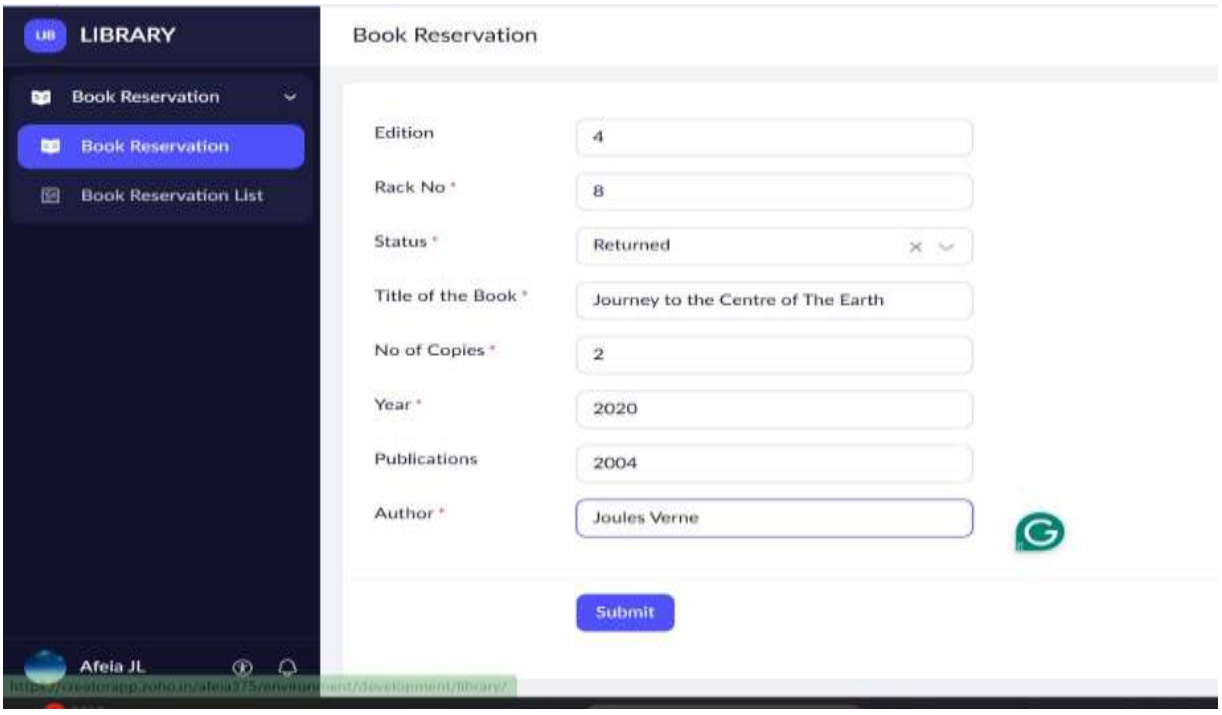

9. Enter sample library book details into the form, such as the title Introduction to Artificial Intelligence, author Stuart Russell, publisher Pearson, publication year 2021, edition 4, rack number A-12, and book status Available.

10. Submit the form and verify that the entered book details are stored correctly in the cloud database.

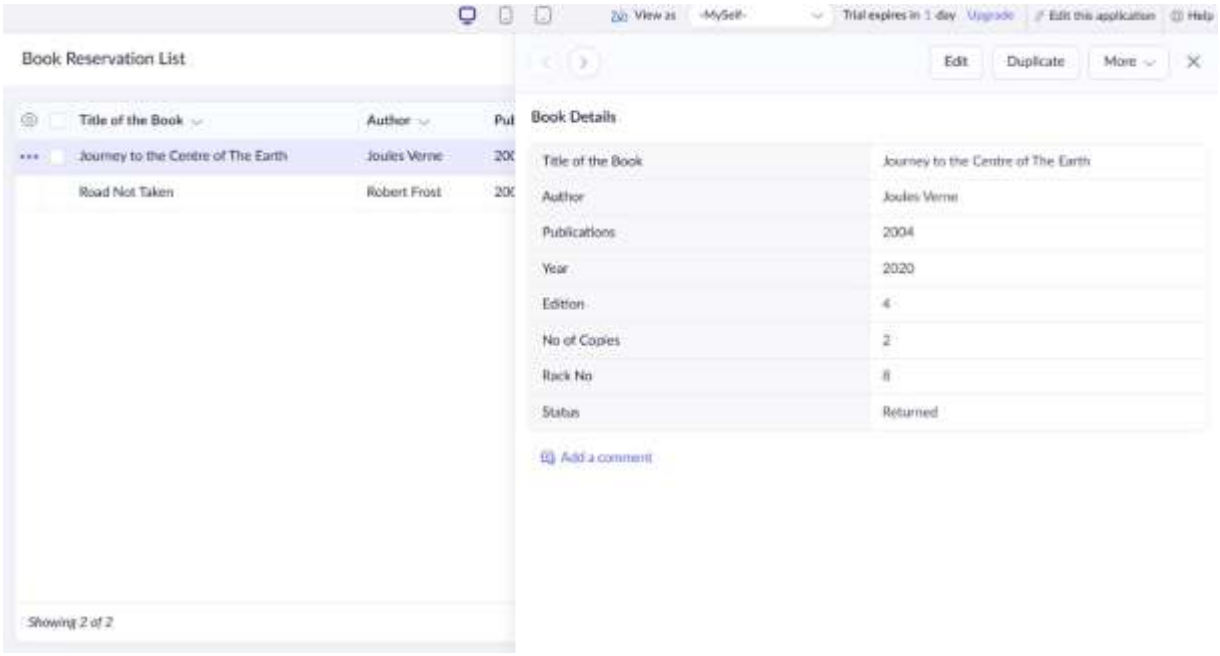

11. Open the library records section to view the submitted book details and test the application by changing the book status to Taken when a book is borrowed and Returned when it is returned.

12. Verify that the Library Book Reservation System works successfully as a SaaS application by allowing users to enter, submit, and view library book details through the cloud platform.

Implementation Input:

Output:

Result

Thus, a Library Book Reservation System for SIMATS Library was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
