Experiment -3

Car Booking Reservation System Using Zoho One (SaaS)

Aim

To create a Car Booking Reservation System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the Zoho One cloud platform using your credentials.

2. Open Zoho Creator from the list of applications.

3. Create a new application named Car Booking Reservation System using a pre-designed template.

4. Select an appropriate template and customize it according to the requirements of the car booking reservation system.

5. Open the existing form and add or modify fields to include the following car booking details:

- Name
- Booking Type (Rental / Outstation)
- From
- To
- Pickup Date
- Pickup Time
- Package Type
- Hours / Days
- Car Type (Hatchback / Sedan / SUV)
- Number of Passengers
- Contact Number

6. Configure the field types appropriately by using dropdowns for booking type, package type, and car type; text fields for name, pickup location, and destination; date and time fields for pickup details; number fields for hours, days, and number of passengers; and a phone field for contact number.

7. Customize the form layout by arranging the fields properly and making essential fields mandatory.

8. Save the changes and publish the customized application.

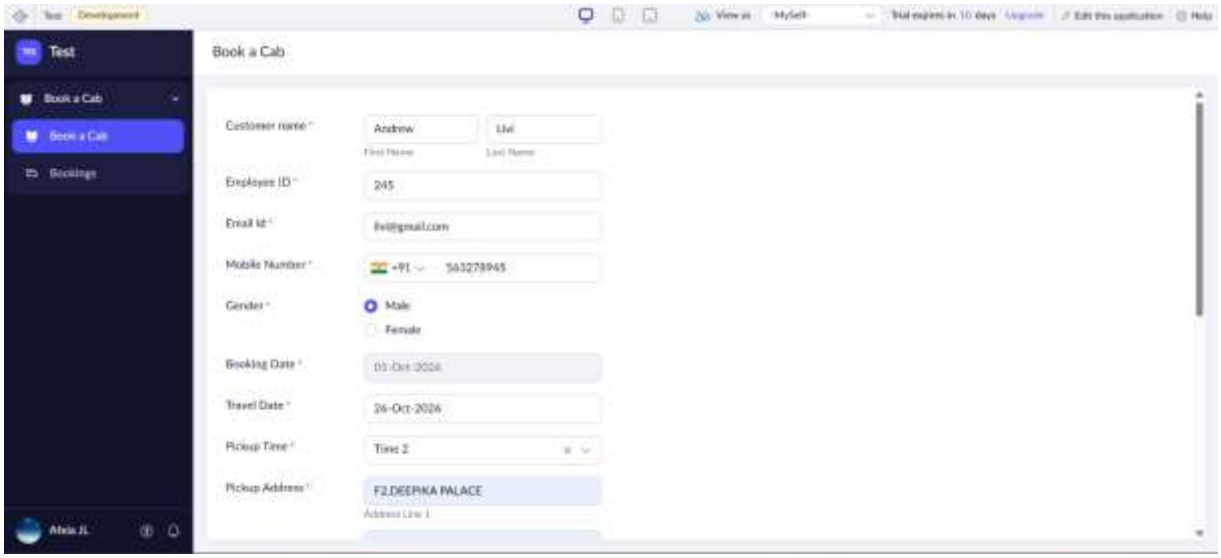

9. Enter sample car booking details into the form, such as Chennai as the pickup location, Pondicherry as the destination, Outstation as the booking type, and the required pickup date, time, and package type.

10. Submit the form and verify that the entered car booking details are stored correctly in the cloud database.

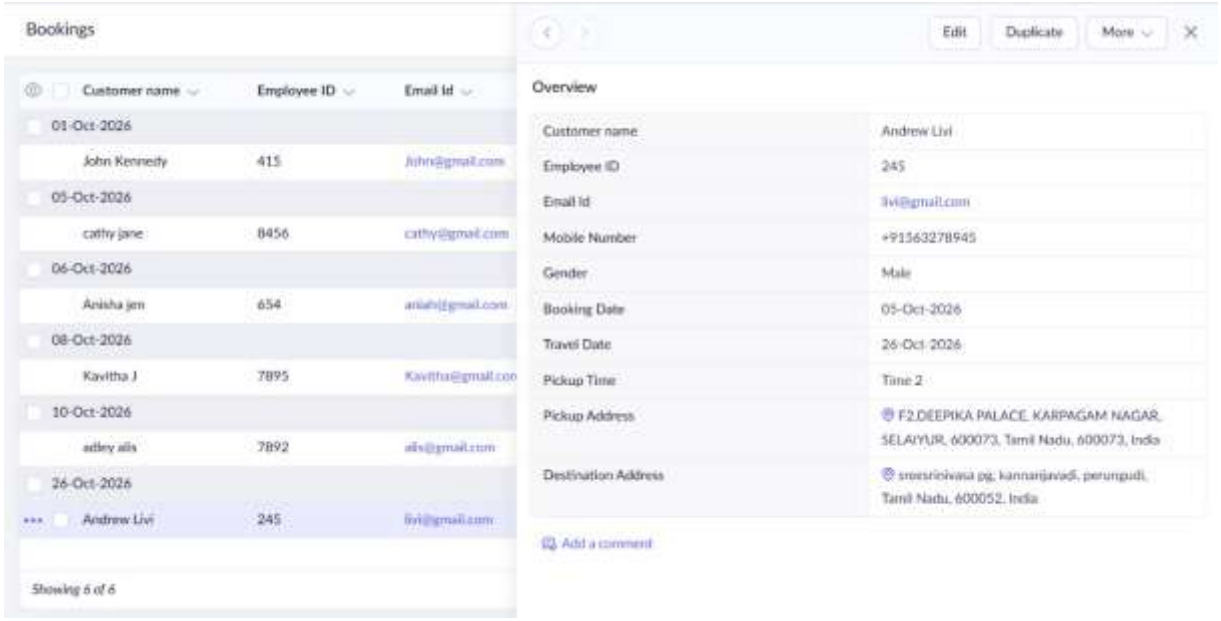

11. Open the bookings or records section to view the submitted car booking details and test the application with different combinations of booking types, destinations, car types, and package types.

12. Verify that the Car Booking Reservation System works successfully as a SaaS application by allowing users to enter, submit, and view car booking details through the cloud platform.

Implementation Input:

Output:

Result

Thus, a Car Booking Reservation System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
